## Europe Flight Simulator

This month we bring you very exciting news of a flight simulator developed by Ollie, Lucas and Danny supported by Air Ollie. This is a massive announcement for the AOG (Air Ollie Group). The president said this: "here at the Air Ollie Group we want to cover all aspects of Roblox under one brand. We are starting by covering all areas of the Ro-Aviation community. We already have a large part in the airline industry and the airport-tech/plane market. Now it's time to go one step further and get into the flight simulator industry. I thoroughly believe we can create something brilliant unlike anything else. The future is bright for this game. We are very motivated and committed to making this a higher quality sim than any other on this platform." The game as the name suggests will be based in Europe and will feature some of Europe's best airports, big and small, hot and cold. The airports will all be exact replicas unlike any other flight sim on Roblox. Users will also be able to choose from a good selection of planes and liveries hand made for the game. After the Alpha release game passes will be added. It is not known if these game passes will be for certain planes or for ranks yet. The development team for EUFS (Europe Flight Simulator) hope to release the game into Alpha for testing this month. It is not known when the full version will be released.

## Interview with a HoD

TheGreatOstrichEgg

Recently we hired new Head of Department staff members. We did a short interview with one of the new Cabin Crew HoD's.

You have recently passed your HR application, how do you feel and why did you choose Air Ollie over other airlines?

I chose Air Ollie due to me being in the airline for quite a long time. I have been a staff member at Air Ollie before.

How is your experience so far?

It has been a quiet experience. As a new staff member you get trained first to get experience to work at a flight.

Do you enjoy working within the team?

Due to past experiences I can judge on the team being very kind.

Describe Air Ollie in one word.

Excellent.

*- Interview done by Happy\_our*

## New AO Headquarters

Mid way through October development on Air Ollie's new home began, based in Reykjavík it would be a multi building campus which would fore fill the needs of the airline outside airport operations. We plan to have a building for each department as well as a head office for Senior High ranking members of staff.

This project is being built by

iiAviaDxnny, Happy\_Our and Ollie. It will feature offices, conference halls, classrooms, training facilities and will ultimately be the true home for the airline and all its employees. We aim to use this place for airline events and basically anything other than flights. We want this to be one of the most modern, detailed and beautiful headquarters in Ro-Aviation. For trainees it will be their first place they remember before starting a job at the airline and for us constantly expanding in staff numbers this is very important.

### Swedish Air

Fly directly to Gibraltar Airport from the stunning airport, Akureyri located in Iceland onboard our new a320neo! We fly from several airports but Akureyi being our main hub/airport. - Swedish Air **"Reach for the skies with Swedish Air!"**

## Hop Airlines - AOG

alphaDxwson

Hello! I am alphaDxwson, on this magazine to primarily to put forward to you a brand new partnership between the Air Ollie Group and Hop Airlines. This has been a very exciting experience for me as an owner because I know that this partnership, as it already is, is very strong, unique and special in the community. Joining the Air Ollie

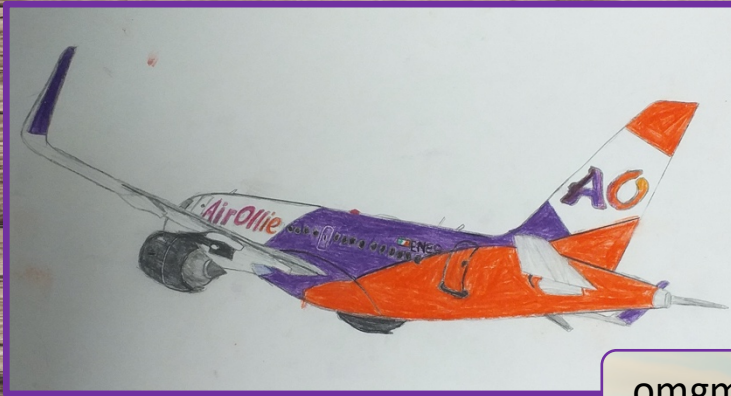

Group has been very important for Hop, as the partnership was formed so early on in the airlines progression. The AOG has supported us through multiple difficulties and you should keep updated with the group as we have one or two very exciting events for the future planned. Hop Airlines is a Europe based airline on Roblox, with operations out of Arvidsjaur, Kuressaare and Bergerac Airport. Our aim is to be a realistic type budget airline on the platform, with medium / short haul routes, with a 2 class configuration, which only sells for 39R\$ is a great thing to purchase for something extra. Finally, thank you for reading, I hope you enjoyed, and I'd like to thank Air Ollie for giving me / Hop Airlines a chance to be in this amazing magazine.

### Air Ollie Website

Recently we have launched the new Air Ollie website! The website is designed to be a big hub for everyone to access. This is a major step forward for the airline socially. It includes fleet info, airports, social links, about the executive board, tickets and more! All issues of the magazine from January onwards are available to download from the website exclusively as well.

Check it out at <https://airollie.jouwweb.nl/>

## Fanart of the month

omgmatty\_17

Share your Air Ollie photos or fanart in the [#pictures](#) channel in our Discord server!

## Friday Quiz Night

We host various events in Air Ollie's Discord server. One of the events we host is the Friday Quiz Night. Every week on Friday we host a quiz, anyone can participate in this event and you can win free class upgrades for on our flights! Join the Discord server for more information!
